Introduction

Authorize.net Payment Terminal Wordpress at a glance

A promotional banner for the Authorize.Net WordPress Payment Terminal v1.1. The banner has a dark blue background with a lighter blue gradient on the right side. In the top left corner, there is an orange triangle with the word "UPDATE" in white. The main title "Authorize.Net" is in large white font, followed by "WordPress Payment Terminal v1.1" in a smaller white font. To the right of the title is the WordPress logo. Below the title, there is a list of features in white text: "- securely accept credit cards on any page / post;", "- one time, recurring payments / subscriptions; trial periods;", "- view & sync transactions from Authorize.Net;", "- built-in payment button shortcode generator;", and "- requires SSL certificate & Authorize.Net account". At the bottom, there is a dark blue box with white text: "Quick & easy payment terminal for your clients to pay for products and services through Authorize.Net API (AIM) on your WordPress website."

UPDATE

Authorize.Net

WordPress Payment Terminal v1.1

- securely accept credit cards on any page / post;
- one time, recurring payments / subscriptions; trial periods;
- view & sync transactions from Authorize.Net;
- built-in payment button shortcode generator;
- requires SSL certificate & Authorize.Net account

Quick & easy payment terminal for your clients to pay for products and services through Authorize.Net API (AIM) on your WordPress website.

Before we explain what Authorize.net Payment Terminal Wordpress is, we want to first thank you for purchasing the Authorize.net Payment Terminal Wordpress application and trusting us to take care of your credit card payment needs.

We appreciate your business!

Overview

Authorize.net Payment Terminal Wordpress allows you to have a quick & easy credit card payment terminal for your clients processed by authorize.net on your wordpress site. Installation and configuration of the script takes less than 5 minutes (however you do need to have SSL and stripe.com account).

There are several options to pay.

- customers can select service from a list
- customers can input price themselves
- customers can be directed to pay for particular service
- customers can be directed to payment page with pre-set amount

You need to generate button (with many different options/settings available to select from) and then you can place it anywhere on your wordpress site, in page or in post. We've also included a widget area, which accepts button code too, so you can use widget to place same button.

Server Requirements

These are the system requirements in order to use Authorize.net Payment Terminal Wordpress. If you are unsure whether your server meets these requirements, contact your hosting company.

- Wordpress site (3.3+)
- Authorize.net account
- SSL certificate (if you don't have one, you can purchase it [here](#). After purchasing certificate you will need to contact your hosting provider or server administrator to install the certificate for you)
- cURL must be enabled

Installation

Installation is really easy. All you need to do is login to your wordpress site as admin, go to plugins and add new plugin:

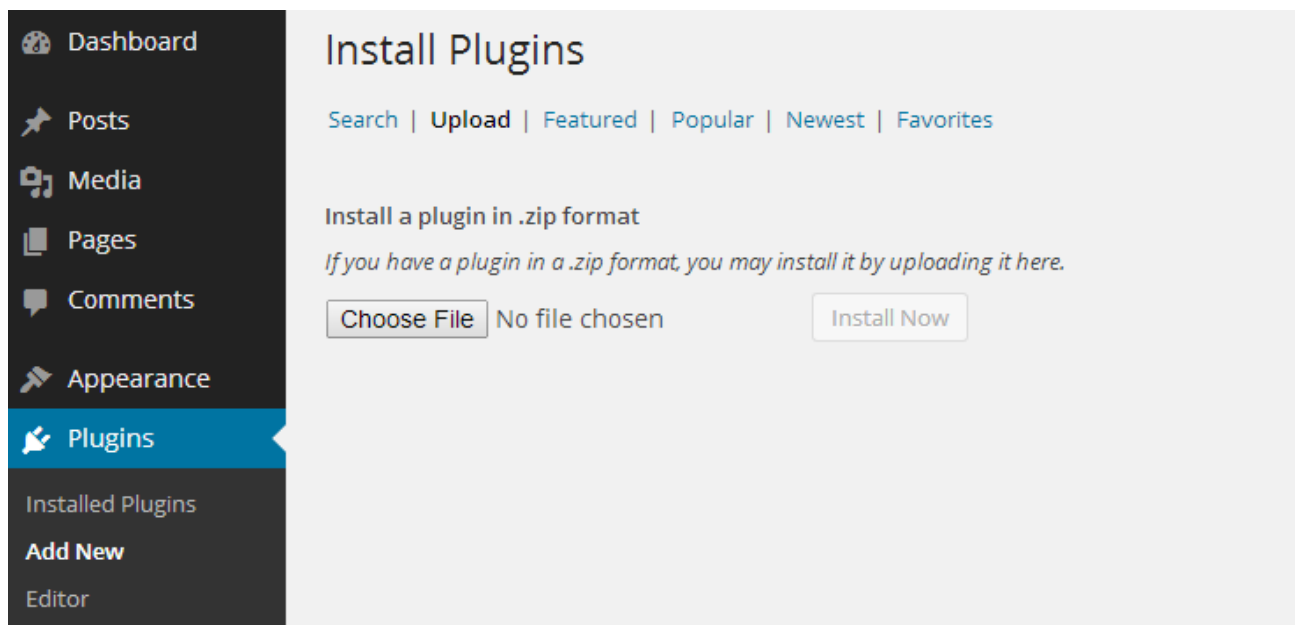

Step 1: Plugins -> Add New

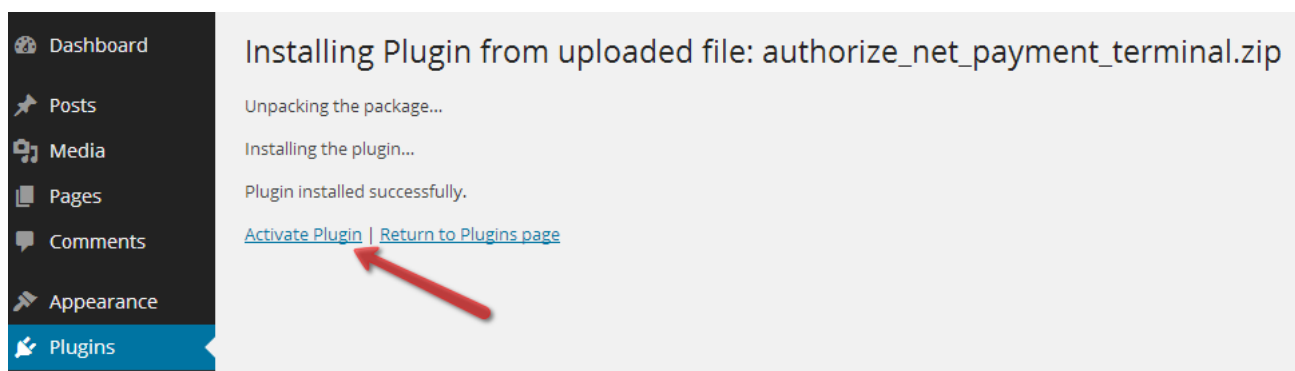

Step 2: Select "upload" link

Step 3: Now, click "choose file", select the ZIP archive which you downloaded from CodeCanyon and then click **INSTALL NOW**.

Step 4: After upload finishes you will see below screen. Press "activate plugin":

You will now see a new menu item in main wordpress navigation on the left side :

The screenshot shows the WordPress dashboard's 'Plugins' page. The left sidebar contains a menu with 'Plugins' highlighted. The main content area shows a list of installed plugins. The 'Authorize.net Payment Terminal for Wordpress' plugin is highlighted with a red box. A red arrow points to the 'Plugin activated.' message at the top. Another red arrow points to the plugin's name in the sidebar. A third red arrow points to the 'Activate' link for the 'Hello Dolly' plugin.

Installation complete! Proceed to configuration section.

Configuration

Right after the installation - you will need to configure your Authorize.net Payment Terminal Wordpress by clicking "Authorize.Net Payment Terminal" -> "Settings" menu item:

You will then see license key page. You need to enter your CODECANYON USERNAME and ITEM PURCHASE CODE for our product.
([Click here](#) to read how to get item purchase code)

The screenshot shows a WordPress dashboard sidebar on the left with the following menu items: Dashboard, Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, Settings, Authorize.net Payment Terminal (highlighted in blue), Authorize.net Payment Terminal, Settings, Services, Button Generator, and Transactions. The main content area is titled "CodeCanyon License Key". It contains the following text: "To finish the installation please enter your valid codecanyon license key and codecanyon username which con". Below this is a note: "Please don't forget that for EVERY INSTALLATION of this script you need to get separate license from codecan additional license, as stated in [Envato Licensing Terms](#)". There are two input fields: "CodeCanyon License Key:" and "CodeCanyon Username:". Below these fields is a "Save License Key" button. At the bottom of the main area, it says "Powered by **convergin**e".

CodeCanyon License Key

To finish the installation please enter your valid codecanyon license key and codecanyon username which con
Don't worry, you will be prompted to do this only once.

Dashboard

When you'll click on "Authorize.Net Payment Terminal" menu item - you will land on the default dashboard of our plugin, which shows you basic information of 15 latest transactions on your site.

Authorize.net Payment Terminal - Overview

This simple plugin enables you to accept credit card payments on your WP website and manage transactions in your website's WP control panel.

Last 15 Transactions

Transaction ID	Date	Name	Email	Amount	Service
0 transactions found					

View All Transactions

The blue button at the end of the screen will take you to all transactions.

Services are quick way of storing some pre-defined charge templates for your button generator. When you will be creating your buttons in next section - you will see that you can select services which you already created in this section.

15 of 28

List of Services

ID	Service Name	Price	Description
<input type="checkbox"/> 1	Monthly Donation edit	10.99	

Delete Selected Services

click to edit the service

list of services with option to delete them.

Button Generator

Authorize.net Payment Terminal - Button Generator

Here you can create shortcodes for payment buttons.

Button text

Button Text:

pre-set amount, will show up only if services are set to "Hide" below. If you don't want pre-set amount, delete default 10.99 and leave field empty

Default Amount:

Tip: Numbers only. ex. 10.99. Applicable only if services dropdown is hidden

Show comments field?: ☐ Yes ☒ No

if you want your customers to have comments field on the checkout page

Services Dropdown: ☒ Hide ☐ Show all services ☐ Pre Select a service

Button Design:

Select Button Style

Generate Button

"Hide" will remove services drop down from checkout page. "Show all services" will display all services in dropdown, and pre-select allows you to select 1 particular service for which customer is paying by clicking this button

Select existing button design, or click generate button

<div>Pay Now</div> <div><input checked="" type="radio"/></div>	<div>Pay Now</div> <div><input type="radio"/></div>	<div>Pay Now</div> <div><input type="radio"/></div>	<div>Pay Now</div> <div><input type="radio"/></div>
<div>Pay Now</div> <div><input type="radio"/></div>	<div>Pay Now</div> <div><input type="radio"/></div>	<div>Pay Now</div> <div><input type="radio"/></div>	
<div>Pay Now </div> <div><input type="radio"/></div>	<div>Pay Now </div> <div><input type="radio"/></div>	<div>Pay Now </div> <div><input type="radio"/></div>	<div>Pay Now </div> <div><input type="radio"/></div>
<div>Pay Now </div> <div><input type="radio"/></div>	<div>Pay Now </div> <div><input type="radio"/></div>	<div>Pay Now </div> <div><input type="radio"/></div>	

Open payment form in lightbox: ☒ Yes ☐ No

this option allows you to specify whether you want button to open lightbox popup for payment, or redirect to payment page

Generate Shortcode

after everything is selected, click this button to get code below. Then copy the code and paste on any page/post or in our widget.

Shortcode:

```
[spt_paybutton text="Pay Now" comment="false" service="false" amount="10.99" design="1" lightbox="true"]
```

Transactions

Authorize.net Payment Terminal - Transactions

Please use filters and sorting functions of this page to view all or specific transactions.

filtering / sorting and searching functionality

Search settings

Filter by Date: From: To:

Sorting: Sort By:

Please Select

Ascending

Apply Settings

Search transaction By Keyword:

Search

clicking this button will sync your stripe account with payment terminal. Payment terminal will download latest 100 transactions from your acc. and will display here, as if they were processed here. This is neat feature for recurring subscriptions - when customer is billed second, third (etc...) time - you can easily display that info in the script by clicking sync button.

All Transactions

Sync from Authorize.net

Transaction ID	Date	Name & email	Amount	Service	Options
0 transactions found					

Powered by **converginē**

Updating to latest version

At the moment, there is no automatic plugin update from within wordpress administration for this product.

To update to the latest version (when you receive a notification from codecanyon for example) - you just need to download the file from codecanyon downloads area, then reupload all the files through FTP (please use FTP client, something like FileZilla will work just fine * Filezilla-project.org). Alternatively, you can upload the plugin zip folder through wordpress plugins section.

If you will deactivate and delete the plugin through wp admin area and then upload new one also through wp admin area - that will work as well, however, please note that all settings and widgets will be dropped, and you will need to edit those again. **Buttons** and **Services** will stay intact though, but copy/paste the authorize.net API information before removing plugin - as it will be wiped out and you'll need to re-enter it once new version installed & activated.

Frequently Asked Questions & How To's

Here you will find most frequently asked questions and how to's

Q. How to edit admin email template "new payment received"?

A. There are 2 emails like that. One goes to admin when recurring transaction is processed, and one when one-time transaction is processed.

For one-time, edit yourdomain.com/wp-content/plugins/authorize_net_payment_terminal/terminal/authorize/form.processing.php lines 236 to 257.

you will see code like this, just edit the required text.

```
234 /*****
235 ADMIN EMAIL NOTIFICATION
236 *****/
237 $headers = "MIME-Version: 1.0\n";
238 $headers .= "Content-type: text/html; charset=utf-8\n";
239 $headers .= "From: 'Authorize.net Payment Terminal' <noreply@.$.S
240 $subject = "New Payment Received";
241 $message = "New payment was successfully received through Authori
242 $message .= "from ".$fname." ".$lname." on ".date('m/d/Y')." at "
243 if($show_services){
244     $message .= "<br />Payment was made for \"".$sanpt_service_name
245 } else {
246     $message .= "<br />Payment description: \"".$item_description.
247 }
248 $message .= "<br /><br />Billing Information:<br />";
249 $message .= "Full Name: ".$fname." ".$lname."<br />";
250 $message .= "Email: ".$email."<br />";
251 $message .= "Address: ".$address."<br />";
252 $message .= "City: ".$city."<br />";
253 $message .= "Country: ".$country."<br />";
254 $message .= "State/Province: ".$state."<br />";
255 $message .= "ZIP/Postal Code: ".$zip."<br />";
256 mail($admin_email,$subject,$message,$headers);
```

Also, please note, line 239 can be changed to your company name and email, so that emails would come from you, and not from your site default address:

Edit the line like this:

`$headers .= "From: 'My Company' <info@mydomain.com> \n";`

Q. How to edit customer email template "thank you for payment" ?

A. Same file as in previous question, **lines 260 to 279.**

Since **v1.1** you can simply add your own text in "thank you message" in plugin settings section - it will appear in customer email template and on thank you page after payment.

Q. How to edit title on the payment terminal page ?

A. Edit yourdomain.com/wp-content/plugins/authorize_net_payment_terminal/terminal/authorize/config.php

line 23 - controls payment page meta title (<title></title>)

line 24 - controls the title above the payment form

Q. How to add more fields to the form, or remove some ?

A. To do any modifications with the form, you have to have at least basic knowledge of PHP. If you plan to record field values in db - then MySQL as well.

Form itself is located here yourdomain.com/wp-content/plugins/authorize_net_payment_terminal/terminal/index.php

You can open that file in your favorite code editing tool and add required form element either by writing custom code, or just copy paste fields which are already added there. Again, you will have to read the code and understand it. If you don't have any programming knowledge - please hire somebody to do the modifications for you (we do provide such service as well, see "[request modifications](#)" section

Q. How to edit recurring subscription cancellation email template ?

A. Edit yourdomain.com/wp-content/plugins/authorize_net_payment_terminal/payment_terminal_transactions.php

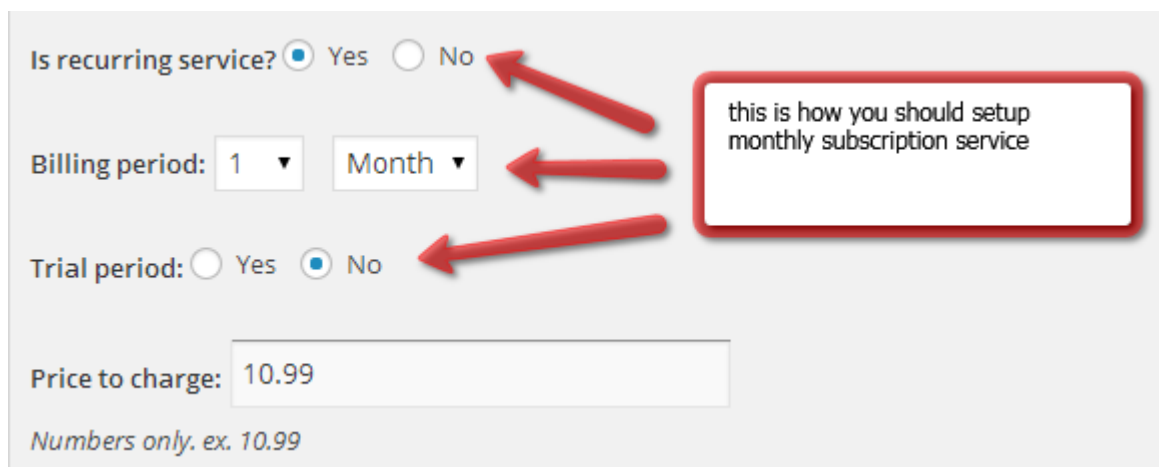

Email template is located on lines 50 to 60.

Q. How to edit look and feel of the form ? Which CSS file is responsible for it ?

A. You can edit style.css which is located here: yourdomain.com/wp-content/plugins/authorize_net_payment_terminal/terminal/style.css

Q. How do I setup monthly subscription service ?

A. Like this:

The image shows a form for setting up a recurring service. It includes the following fields and options:

- Is recurring service?** with radio buttons for ☒ Yes and ☐ No.
- Billing period:** with a dropdown menu showing '1' and another dropdown menu showing 'Month'.
- Trial period:** with radio buttons for ☐ Yes and ☒ No.
- Price to charge:** with a text input field containing '10.99'.

Below the price field, there is a note: *Numbers only. ex. 10.99*.

A red-bordered box on the right contains the text: "this is how you should setup monthly subscription service". Three red arrows point from this box to the 'Is recurring service?' radio buttons, the 'Month' dropdown, and the 'Trial period' radio buttons.

Technical Support

We are glad to provide courtesy support for all our products to our valued customers within **24-48 hours** (in rare cases within 72 hours) after receiving the request on our support forums.

If you need any help regarding the installation of the script or any other question please go to our support forum : <http://support.converginer.com> (please note, you will need to register on the forum in order to read/write posts. You **MUST** provide your **license key (which is the item purchase code)** and **CodeCanyon username** during the registration process, which will then be validated through CodeCanyon API.). [Here is how you can get your Item Purchase Code](#)

Please note that **we do not provide support by email**. Any email related to support and not to pre-sales questions will be replied to after any other support posts on our forums are resolved **and in general will be asked to open new thread on support forum**, since we need to validate your purchase through the forum registration mechanism, to make sure that purchase is legit and license is valid.

For more details about our support policy and terms of service (including what is and is not included in Basic Support) [click here](#):

Our business hours are **Monday - Friday: 10:00am - 5:00pm (GMT -5)**, and support is provided only at that time. Upon posting to the support forum, we make it our goal to respond within 2 business days, however depending on the issue you're having it may take a bit longer, but in any case we will address the issue within 2 business days with at least "resolution time" in reply. We also occasionally monitor the forums during non-business hours and weekends, however this is an exception, since we do value the time we spend with our families.

Changelog

v1.3 (13 November 2015)

- added reCaptcha
- fixed widget compatibility with Wordpress 4.3

v1.2 (1 July 2015)

- recurring subscriptions fix
- added customerIP address to one-time payments
- fixed AnetApi/xml/v1/schema/AnetApiSchema.xsd:length error
- added fix for admin transactions sync
- updated prettyPhoto library to v3.1.6 (security patch)

v1.1 (16 December 2014)

- fixed issue with payment description and customer name not passing
- replaced all mysql_ queries with proper wordpress db queries
- replaced mail() function with native wp_mail() for all notifications
- added "thank you message" from settings to the emails and on thank you page
- replaced the_editor() with wp_editor()
- all undefined variables / deprecated messages fixed

v1.0.1 (11 July 2014)

- address bug fix for recurring profiles (now address is properly passed to authorize.net ARB)
- one-time payment address fix
- test mode bug fix

v1.0 (27 June 2014)

- initial version released

Request Modifications

We are happy to assist you with any custom development or custom design, whether it is related to our products or not.

Our standard hourly rate is (USD) **\$100 per hour**.

Custom development quotations are provided **only through direct e-mail**. You can send your technical description to info@converginer.com or fill out the [Contact Form](#) on our main website.

We will reply with a quote within 2 business days.

Feature Suggestions

We are always happy to hear your ideas, and have setup a support forum where all our registered buyers can suggest features for the next product update, or simply [click here](#) and fill out the form.

We also welcome any feature suggestion through the Envato marketplaces comments on the product page itself.
